

Each winter deer browsing causes millions of dollars in damage to landscape plants. For nearly 20 years, DeerPro™ has been used by nurseries protecting plants from damage.

It will soon be time to protect your valuable landscaping from winter deer damage. Please fill out and return the attached card to sign up for your fall DeerPro™ application.

State law requires that we supply you with the label of the product we are applying. Be assured that we are concerned about the safe use of pesticides in the environment and would not use or apply them unless totally convinced of their safety.

Everett's Landscape does not guarantee plants against deer damage. We will not replace or refund plants for any reason including deer damage due to operator or spray failure. We ask the home owner to inspect the landscape for coverage and damage throughout the winter months. We will gladly touch up any application.

If in eyes:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call poison control center or doctor immediately for treatment advice.

SYMPTOMS OF POISONING

No specific symptoms. Acute poisoning is accompanied by general depression and illness. Consumption of alcoholic beverages with exposure the Thiram may cause flushing, breathing difficulty, nausea, vomiting and low blood pressure. In case of poisoning, call a physician immediately, Have patient lie down and keep quiet.

NOTE TO PHYSICIAN

No specific antidote is available. Treat symptomatically. In the presence of consumed alcohol, Thiram responds similarly to Disulfuram.
